R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
# diabetic_data = spark_read_csv(sc,
# '/Users/matt/Desktop/Dropbox/Home/College/Edinburgh - MSc Data Science/Big
# Data Analytics/diabetes_readmissions/RawData/diabetic_data.csv')
# diabetic_data = spark_read_csv(sc,
# '/home/jovyan/Matt/diabetes_readmissions/RawData/diabetic_data.csv')
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
